FINDER ®

OVER TWO DECADES OF REDUCING CRIME

FINDER® Software Solutions has been delivering innovative software to law enforcement agencies for over 20 years, focusing on empowering collaboration, streamlining operations, and enhancing both officer and public safety. Our suite of products is designed to provide a unified platform for data sharing and investigative lead generation, enabling agencies to solve crimes more efficiently.

Increased Officer Safety

Near real-time insights, enabling law enforcement to quickly assess threats, strategically deploy resources, and improve situational awareness.

Increase Productivity

Develop more leads and accelerate investigations by breaking down silos and accessing hard-to-find information across multiple jurisdictions.

Reduce Crime Rates

Proactive measures and thorough investigations disrupt developing crime trends and clusters made possible by comprehensive and aggregated data.

WHO IS FINDER?

FINDER Software Solutions is a dedicated team of skilled developers, designers, and project managers who combine technical expertise with a deep understanding of public safety operations. Our mission is to create officer-focused solutions that enhance efficiency, collaboration, and investigative capabilities.

With a commitment to quality, security, and innovation, FINDER stands out as a trusted partner for law enforcement agencies. Our solutions provide a unified platform for accessing critical data, enabling seamless information sharing, uncovering investigative leads, and identifying criminal patterns. By streamlining agency collaboration and putting actionable data within reach, FINDER empowers law enforcement to solve crimes faster and more effectively.

FINDER INVESTIGATE

ACCELERATE JUSTICE: SOLVE CRIMES FASTER

FINDER integrates RMS, CAD, JMS, Pawn, and other data sources with content-rich sources like public and criminal records, facial recognition, and vehicle information, making all these details accessible from a single platform. By breaking down silos and crossing jurisdictional boundaries, FINDER enhances agency efficiencies and establishes itself as the primary investigative starting point for law enforcement agencies.

VERSATILE SEARCH METHODS

FINDER offers versatile search methods that allow investigators to tailor their approach based on the details they have. Whether searching by specific keywords, partial information, or conducting advanced filtered searches using attributes like names, locations, or timeframes, FINDER ensures quick access to relevant data. By aggregating information from various sources such as RMS, CAD, JMS, and pawn records, and gun crime databases, FINDER helps investigators uncover leads, identify connections, and track criminal patterns. This flexibility enables investigators to adapt their search strategies efficiently, leading to faster and more effective case resolutions.

KEYWORD SEARCH	PEOPLE/PLACES SEARCH	VEHICLE SEARCH	PROPERTY SEARCH
FREQUENT PAWNER/SCRAPPERS	CRIME ANALYTICS	IMEI SEARCH	LOCAL FIREARM SEARCH

FINDER sets itself apart from competitive systems by offering a fully integrated, cost-effective platform that seamlessly connects law enforcement agencies, enabling secure data sharing across jurisdictions. With over 20 years of experience, FINDER's solutions are built to adapt to the evolving needs of public safety, featuring easy implementation, and robust analytics. Unlike other systems, FINDER focuses on enhancing collaboration and operational efficiency while providing insights that accelerate investigations and improve public safety outcomes.

FIREARM & BALLISTICS MANAGEMENT

TRANSFORMING GUN CRIME MANAGEMENT FOR LAW ENFORCEMENT

The FINDER Gun Crimes Module provides an innovative, integrated solution, replacing outdated methods like Excel spreadsheets. Now, all critical data regarding gun crimes is centralized, streamlined, and accessible at your fingertips.

FEATURES:

- Centralized Data Management
- Heat Mapping
- Gun and Ballistic Integrations
- Robust Reporting Tools
- Intuitive User Experience

FINDER ANALYTICS

USING FINDER ANALYTICS TO IDENTIFY AND MONITOR CRIME INCIDENTS

The FINDER Crime Analytics module equips law enforcement agencies with powerful tools to analyze crime trends and patterns, enabling data-driven decision-making. By offering valuable insights into crime hotspots and trends, the module helps agencies allocate resources more effectively and predict future criminal activity. This proactive approach enhances operational efficiency, speeds up investigations, and contributes to safer communities.

FEATURES:

- Agency Crime Stats
- Heat Mapping
- Top Offender List
- Relational Searches
- Geofencing
- Link Charts

FINDER
SOFTWARE SOLUTIONS

BULLETINS

PUT THE POWER OF BULLETINS TO USE

With FINDER Bulletins, the standard bulletin has become more powerful. Agencies can post, share, and view department bulletins and notices with the FINDER platform. This increases officer awareness of current trends, wanted persons, and BOLOs. In a digital and searchable environment it also makes it easier for other departments to absorb and respond to the information.

- Current & Historic Bulletins
- Image Metadata Information
- Incident Type & Location
- License Plate Number

- Subject Name
- Subject Traits
- Vehicle Characteristics

FINDER MESSENGER

UNITING LAW ENFORCEMENT THROUGH SECURE COLLABORATION

FINDER Messenger, a secure, efficient, and CJIS-approved collaboration platform for investigative working groups. Revolutionize your communication and teamwork with our platform specifically designed to meet the unique needs of law enforcement. FINDER Messenger is your solution for investigative collaboration and information sharing!

- Secure Platform
- Create Private Groups
- Share Information

- Real-Time Chat
- User-Friendly Interface
- Audit Trail

SOFTWARE SOLUTIONS

FEATURED DATA

RECIPERO

Recipero is fully integrated into the FINDER platform and available to all users, providing seamless access to an extensive mobile device database. With over a billion device records, agencies can quickly check if a device has been reported lost or stolen and access detailed device model information. Recipero's National Mobile Property Registry enhances patrol, investigations, and security screenings, helping agencies improve operational efficiency and streamline processes like never before.

LUCIDIUS

Lucidus is a powerful investigative tool that is searchable within the FINDER platform. It provides access to 120 billion person records and 155 million U.S. parcel records. Users can search by name, DOB, SSN, address, phone number, or email to retrieve historical data, relatives, and associates.

THOMSON REUTERS*

Agencies with a Thomson Reuters account can now access its vast collection of public and proprietary records directly from the FINDER platform. This integration provides seamless access to vital data, enhancing investigative capabilities and efficiency. Discover how this powerful tool can help your agency make more informed decisions and benefit your community

CLEARVIEW AI*

Agencies with a Clearview AI (CVAI) subscription can now integrate it into the FINDER Platform, adding powerful facial recognition to search results. This integration allows users to run photo image searches directly from FINDER, instantly cross-referencing images against Clearview AI's extensive database. By streamlining suspect identification and investigative workflows, agencies can enhance patrol, missing person searches, and case resolution—all within a single platform.

*Requires an agency subscription for integration.

FEATURED

EVIDENCE IQ

Agencies with a Ballistics IQ™, developed by Evidence IQ, is the only automated ballistics imaging triage solution that allows for instant scanning of ballistic evidence. It delivers real-time, unbiased, forensic-based intelligence to law enforcement, helping them respond swiftly to gun-related crimes. Ballistics IQ directly supports the ATF's NIBIN (National Integrated Ballistic Information Network) and CGIC (Crime Gun Intelligence Center) initiatives in the ongoing effort to combat gun violence.

N-DEx

The N-DEx system is an unclassified, nationwide information-sharing platform that allows criminal justice agencies to search, connect, analyze, and share records from local, state, tribal, and federal sources. It serves as a strategic investigative tool, helping to bridge information gaps and enhance situational awareness.

LInX

LInX - the Law Enforcement Information Exchange - is an advanced information sharing system and analytical data warehouse containing information from participating state and local law enforcement agencies located within the a regional LInX system. LInX is a joint initiative sponsored by the Naval Criminal Investigative Service (NCIS) of the U.S. Department of the Navy, and various regional and local law enforcement agencies located throughout the nation.

Data Source Integration

FINDER Investigate connects data across agencies and jurisdictions, enhancing collaboration like never before. With the ability to seamlessly integrate various data sources your agency uses, into a single, easy-to-use interface. Empowering law enforcement with a comprehensive solution to share intelligence, streamline investigations, and tackle complex cases with greater speed and coordination.

FINDER PAWN

THE MOST AFFORDABLE COMPREHENSIVE PAWN SOLUTION FOR LAW ENFORCEMENT

FINDER Pawn is a cost-effective solution that streamlines the tracking of pawned, scrapped, and second-hand items. Investigators gain access to searchable records, helping to identify stolen property, track suspicious activity, and generate leads. FINDER Pawn enhances collaboration, accelerates investigations, and provides a more efficient way to recover stolen items while improving overall case management.

In-Depth Transaction Insights

Comprehensive details on pawn, secondhand, and scrap metal transactions, including item descriptions, customer information, and related images.

Precision Search Tools

Advanced search capabilities to effortlessly and swiftly locate specific items or customers, enhancing efficiency and productivity.

IMEI Lookup Capabilities

Leveraging Recipero for IMEI lookup gives access to device histories, identifying device make and model, if a device is stolen and more.
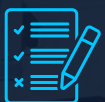

Intuitive User Experience

Effortless navigation and intuitive design ensure ease of use for agencies and shop owners without sacrificing depth or functionality.

Collaborative Data Sharing

Easily share data with other departments and agencies, boosting cooperative efforts to recover stolen property and close cases.

Powerful Reporting

Quickly identify repeat customers. Subscribe to automated alerts of stolen property and non-compliant shops.

Benefits

- ✓ **Cost-Effective Solution**
- ✓ **Higher Recovery Rates**
- ✓ **Continuous Transaction Updates**
- ✓ **Identify Persons of Interest**
- ✓ **Empowered Data Control**

> **Elevate Your Agency's Stolen Property Investigations**
